

Electrical motor pump, small and compact with low center of gravity. Equipped with a well—protected pressure gauge and remote control for single—acting cylinders/tools. 70 Mpa / 2500cm³

Two stage function designed for faster operation on low pressure. The system switches automatically between low and high pressure to ensure maximum efficiency whatever the load.

The motor only runs during pumping, the pressure is maintained until manually released. Can be started at max. pressure.

Built—in safety valve to protect against overload.

- Adjustable regulating valve, 0-70MPa
- Manual release valve
- Vented non-leakage refill plug
- Gauge as standard, well protected by the handle

Name	Item code	Working press. MPa	Eff. oil vol. cm ³	Cap. cm ³ /min	Motor Power V/kW
